

## Details Carbon Footprint calculation

**Name event** Club of Rome Global Assembly 2009

### General information

Date event 26-27 oktober  
 Duration in days 2,0  
 Number of participants 725  
 Location Harbour Music Hall Adam

### Energy consumption

Natural gas consumption **m3** 3625  
 Electricity consumption - not green **kWh** 5437  
 Electricity consumption - green **kWh** 0  
 Diesel fuel consumption generators **liters** 0

### Mobility

#### Participant from host country

Number of participants from host country 550  
 Average return distance participants host country - venue **km** 150  
 Number of participants from host country travelling by car 0  
 Number of participants from host country travelling by coach 0  
 Number of participants from host country travelling by train 550

#### Participants from abroad

Number of participants from abroad 175  
 Average return distance participants from abroad - venue **km** 0  
 Number of participants from abroad travelling by car 0  
 Number of participants from abroad travelling by coach 0  
 Number of participants from abroad travelling by train 0

**Number of flights** unknown, offset by partner

### Road transport

Diesel fuel consumption road transport **liters** 0  
 Total distance road transport **km** 0

### Catering

Total cost of catering **euro's** 125000

### Hotel stays

Number of nights stayed in Hotels by both participants and organisation 175

### Paper consumption

Office paper (not recycled) **kg** 2  
 Recycled office paper (recycled) **kg** 0  
 Printed paper (brochures, flyers, etc.) **kg** 17

### Other emissions

Other emissions **CO2 eq.** 12,98

### Carbon Footprint calculation

Energy consumption 11,21  
 Transport participants host country 2,81  
 Transport participants from abroad 0,00  
 Flights 0,00  
 Road transport 0,00  
 Catering 89,25  
 Hotel stays 3,68  
 Paper consumption 0,08  
 Other emissions 12,98

**Total emissions event** 120,00
